

Testimonial from bskrp

from Poland

I help people with formation and running of commercial companies in Poland. Since the beginning of my law studies I have been interested in company law, which is why I decided to pursue my interests and help entrepreneurs with creation, registration and day to day basics of Polish Limited Liability Companies. Since some legal structures here in Poland were received directly from Delaware Code I also developed interest in Delaware companies. That is when I contacted with Valis and established cooperation with them. Selling Delaware companies was fine addition to my legal business and working with David and Tracey was and still is pure pleasure.
